

Beds to Sedan

On Saturday 28 November yet another willing band of West Perth Rotarians rolled up their sleeves in aid of the club's highly successful Medical Equipment Recycling program (MERC).

This time it was to pack a seatainer with hospital beds for shipment to Sudan.

To those who attended President Tina said: "It went extremely well yesterday and we had a lot of fun. Yesterday was the best example I have seen for a long time of perfect team work. Everyone's skills were very valuable on the day – even Mike's fork lift driving skills!

"Everyone has the capacity to serve – all you need is the will," she said.

"I appreciate your efforts so much for making all this happen."

From supervising a forking jumble of beds...

...the Mattioli family heaves and sorts (under more hip-hugging supervision)...

...to fill the sea container.

And the obligatory line up of workers
